

## Electronic Medical Resources Holds Annual Luncheons for Houston Physicians

Press Release (Category: Healthcare IT, and Electronic Medical Records)

For Immediate Release

**On Wed. March 6, 2009, led by CEO and President, Lawrence Wedekind, IntegraNet Physician Resources™ and Electronic Medical Resources™, EMR,** commenced their annual physician luncheons which targeted their extensive Houston-Area network of IntegraNet and EMR Primary Care Physicians. These luncheons are designed to help physicians maximize their patient's healthcare, optimize sharing of relevant patient information (within HIPAA guidelines), and capture all the relevant patient coding. These 4 meetings, which will occur over the next 2 weeks in all areas of the city, will also assist in showing the doctors how to comply with Patient Care guidelines established by Medicare and Medicaid in order to maximize preventative and routine office visit patient care, and minimize waste, such as frequent Emergency Room visits, and other mostly-avoidable emergency treatment costs. At these meetings, the Electronic Medical Resources products, and the suite of AllScripts™ electronic medical records and Practice Management solutions are presented and feedback is solicited from offices who are already on the EMR system. Over 30 implementations of EMR are either completed or underway in the Houston Area. Within the past week, AllScripts™ went so far as to declare **EMR** their "national platform" of choice for their products due to the many successful implementations and results already seen in the Houston area in just over one year.

According to one physician attendee, Dr. Warren Longmire, a respected family physician who practices in the Galveston area:

"Today was the first meeting I have ever been (to) where the presenters were very well prepared, delivered unhurriedly, answered questions on the level they were asked, never talked down to anyone, and finished on time. WOW, what a presentation Larry gave! Connie, (IntegraNet's Nurse Case Manager), did a great job of filling in any gaps he left...I told each one what a pleasure it was to...learn how to help both myself and the company, while doing a quality rendition of care. Larry asked me to say a word or two about how we are progressing (with our EMR implementation). I challenged anyone to find a better company. Since I have been with more than 12 companies in the last 35 years, your teachers are "heaven sent"!

Dr. Longmire concludes by saying: "I'm (not) blowin' smoke one bit. THANKS for inviting me to work with the (EMR) A-Team."

Electronic Medical Resources is a revolutionary Electronic Medical Records ISP service provider. The company owner, Mr. Lawrence Wedekind, has Master's Degrees in Healthcare and Hospital Administration and Commercial Real Estate. Through his large Independent Physician Association, IntegraNet, with well over 1200 physicians, he has been helping physicians in the Houston area with Medicare and Medicaid contracting for over 15 years. His organizations also work side by side to reward physicians financially for quality and standard of living improvements in patient healthcare according to government and other health and performance guidelines. Please contact Larry Wedekind or Ed Horn at 281-447-6800 for more information, or visit [www.integranettx.com](http://www.integranettx.com), and [www.electronicmedicalresources.com](http://www.electronicmedicalresources.com).
